

How technician commission is calculated

Oasis Globe - figures read live from the system on 18 August 2026 at 3:12 pm

1. There are two rules, and the brand decides which one applies

Every part on a bill earns the technician something, and how much depends entirely on whose part it is. The catalogue records a brand against each part, and that brand picks the rule. Nothing else about the job changes it.

- **Kent and Aquaguard parts** earn a percentage of what the customer paid for them: 8% normally, 10% on a day the target is met. Neither the floor price nor what we paid for it comes into it.
- **Oasis parts** earn the margin — what the customer paid, minus the price we give the part to the technician at. Sell an Oasis filter for Rs. 450 that we give him at Rs. 350, and the Rs. 100 difference is what the commission is worked out on.
- **A part with no brand written against it** earns nothing — not because such parts are meant to be unpaid, but because with no brand there is no rule to apply. See section 7: seven parts are in that state today, and three of them are Kent parts.

The reasoning behind the split: on another company's product we are a service channel earning a slice of the sale, while on our own product the technician is given a floor price and keeps what he sells above it.

2. GST comes off every payout

Part prices are MRP, and MRP already contains 18% GST. That tax is owed to the government on the sale whichever way the customer pays, so it was never ours to share. Commission is therefore worked out first and then reduced by 18% — on both rules, cash or online alike.

This settled in two steps. Until 6 August 2026 the Oasis margin was paid gross, which meant an identical job paid about 22% more if the customer happened to tap UPI. On 12 August 2026 the same correction reached Kent and Aquaguard, where the percentage had been taken off the full MRP and so was quietly paying commission on the tax as well.

3. The daily target lifts the branded rate for the whole day

Add up everything a technician billed in one day. If it reaches Rs. 10,000, every Kent and Aquaguard part he sold that day earns 10% instead of 8% — including the jobs he finished in the morning, before the target was anywhere in sight. The rate is applied backwards across the whole day, exactly as promised.

The Oasis margin rule is not affected by the target. The service charge counts towards reaching the target but earns no commission itself.

4. What earns nothing

- The service charge — it counts towards the daily target, but pays no commission.
- Jobs that are still open. Commission is computed from closed tickets only.
- Parts whose brand is blank in the catalogue — covered in section 7, because that is a gap in the data rather than a decision about pay.

5. Three real bills, worked through

These are actual closed jobs from the system, not examples. Each line shows the arithmetic that produced the figure.

OG-150826-0003 - Chhagan Bhamre

Bill Rs. 800 | service charge Rs. 350 | paid online (UPI Rs. 800)

Part	Brand	Rate x Qty	How it is worked out	Commission
Oasis PP Spun filter	oasis	Rs. 450 x 1	Rs. 450 sold - Rs. 200 floor = Rs. 250 margin, less 18% GST	Rs. 205
Technician earns from this bill				Rs. 205

Part	Brand	Rate x Qty	How it is worked out	Commission
------	-------	------------	----------------------	------------

OG-180826-0002 - Chhagan Bhamre

Bill Rs. 2,400 | service charge Rs. 350 | paid online (UPI Rs. 2,400)

Part	Brand	Rate x Qty	How it is worked out	Commission
Kent carbon filter	kent	Rs. 650 x 1	Rs. 650 x 8% = Rs. 52, less 18% GST	Rs. 42.64
Kent Sediment filter	kent	Rs. 650 x 1	Rs. 650 x 8% = Rs. 52, less 18% GST	Rs. 42.64
Kent UF 4"	kent	Rs. 750 x 1	Rs. 750 x 8% = Rs. 60, less 18% GST	Rs. 49.2
Technician earns from this bill				Rs. 134.48

OG-160826-0009 - Bhujang Sangle

Bill Rs. 1,500 | service charge Rs. 700 | paid cash (Cash Rs. 1,500)

Part	Brand	Rate x Qty	How it is worked out	Commission
Oasis Sediment filter	oasis	Rs. 350 x 1	Rs. 350 sold - Rs. 350 floor = Rs. 0 margin, less 18% GST	Rs. 0
Oasis Carbon Filter	oasis	Rs. 450 x 1	Rs. 450 sold - Rs. 350 floor = Rs. 100 margin, less 18% GST	Rs. 82
Technician earns from this bill				Rs. 82

6. Missing floor prices, and what they do to the payout

The Oasis rule pays on the margin, so it needs the floor — the price we give the part to the technician at ("Minimum price" on the stock screen). Of 59 Oasis parts, 19 have it blank.

A blank floor reads as zero, so the whole selling price is treated as margin and the technician is paid on all of it. The examples above contain such a line:

This may be exactly what was intended for parts we assemble ourselves. If it is not, filling in the cost against those parts changes the payout immediately — nothing else has to be altered.

Kent and Aquaguard parts have it blank too, but that is harmless: their rule is a percentage of the selling price and never looks at the floor.

Oasis parts with no floor price set
GAC 10"
Oasis HPS
CTO 10"
Oasis flush valve-DT
DX PCB WARRENTY REPLACE
SENSOR
Oasis 1/4-inch tubing-FG
COMPACT BLOCK
PIPE 1/4
Oasis LPS
Oasis RO HOUSING
Oasis Non-return valve (NRV)
Oasis Wire Harness
UV Tube 4W
KENT TYPE SV
UV TUBE 11W
UV TUBE 8W
OASIS RO 100 GPD-1YR
MULTIFUNCTIONAL 24V PCB

7. Parts with no brand — currently paying nothing

The brand is what selects the rule, and it is a field someone fills in, not something the system can work out from the name. 0 parts in the catalogue have it blank. Those parts pay the technician nothing at all, whatever they sell for.

Three of them are plainly Kent parts. Sold today they would earn nothing, when by the rule they should earn the Kent percentage. Only one has reached a bill so far — a Kent ballast billed at zero on OG-270726-0005 — so no commission has actually been lost yet. Setting the brand on these fixes them; no code change is involved.

8. When the rules changed

Date	Change
6 Aug 2026	GST taken off the Oasis margin, cash and online alike. Before this the same job paid noticeably more when the customer paid by UPI.
7 Aug 2026	Branded rate raised from 6% to 8%, and to 10% on a day the Rs. 10,000 target is met.
12 Aug 2026	GST taken off the Kent and Aquaguard percentage too, which had been calculated on the full MRP. Jobs already closed were not recalculated; this applies from that date on.

The rules live in one place in the code (services/incentives.js). Payouts are always computed from closed tickets and never stored, so a corrected price or cost is reflected the next time the figures are read.
